SECURDATA SAGL

TachoGest 2

Software for downloading, archiving and checking digital tachograph data, with Swiss and European rules.

- ***Infringements with the rule broken and how serious it is.***
- ***Registers, monthly reports and inspection file in one click.***
- ***Reminders for every download and every deadline.***
- ***Your data stays in-house, on your PC or network.***

Compatible with:

- 1st and 2nd generation digital tachographs, Smart 2 included
- USB smart card readers (PC/SC)
- Windows 10 and 11
- Download keys that produce .DDD files
- Excel and PDF for reports and lists
- 1st and 2nd generation driver and company cards

No recurring fees · No annual subscriptions! Licence with no expiry, compliant with European and Swiss regulations: OLR 1 and 2, Reg. (EC) 561/2006 and (EU) 165/2014.

Card downloads from the reader and vehicle unit downloads from the key, with the originals kept intact

Infringements graded by seriousness: driving, breaks, rests, working time, driving without a card

Reminders for downloads, licences, driver CPC, medical checks, roadworthiness tests and calibrations

Each driver's day on a timeline, with remaining driving and working time

Weekly register, monthly report, inspection file and driver instruction ready to sign

Archive shared over the office network, with automatic, verified backups

How does TachoGest work?

You put the driver card in the reader, or plug in the download key used for the vehicles. TachoGest recognises every file, assigns it to the right driver or vehicle and keeps the original intact, with its digital fingerprint. Straight away it checks driving, breaks, rests and working time against the rules of the company's country: OLR 1 or OLR 2 in Switzerland, Reg. (EC) 561/2006 in the European Union. It updates the deadlines and prepares the documents: weekly register, monthly report, inspection file, driver instruction and reports in PDF and Excel. The archive stays on the office PC or in a network folder, with automatic backups.

1 · Download

the card from the reader, the vehicle unit from the download key

→

2 · Check

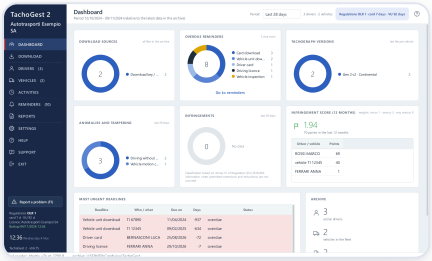

Swiss or European rules, infringements and deadlines

→

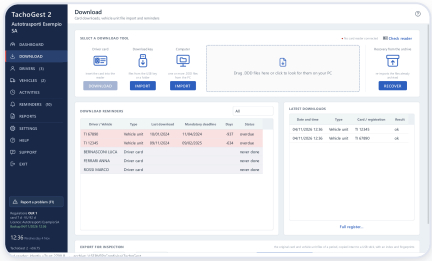

3 · Document

registers, monthly reports, inspection file and reports

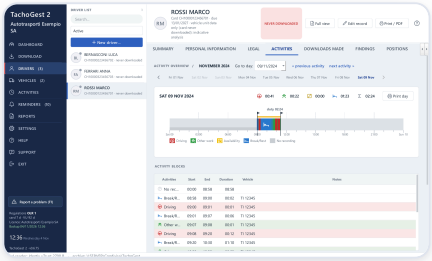

TachoGest screens

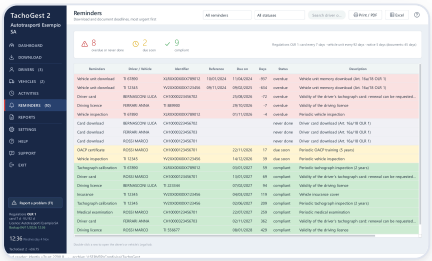

The dashboard: overdue items, infringements and tachographs at a glance

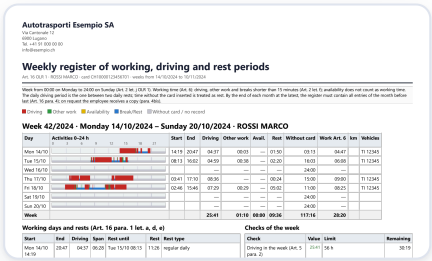

Download from the card, the key or a folder

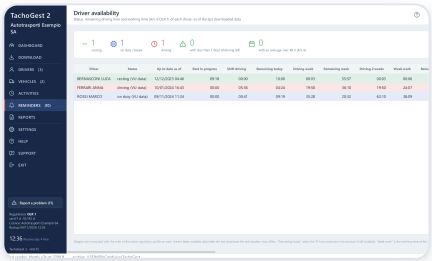

Each driver's day, minute by minute

All deadlines in a single list

The weekly register, ready to sign

Remaining driving and working time per driver

Where to buy TachoGest

A 30-day free trial. No recurring fees, no annual subscriptions: a licence with no expiry by number of drivers, unlimited vehicles, updates included, ticket support for 12 months. Compliant with European and Swiss regulations.
